How to measure for perfect roman shades

First, some important decisions....

Name: _____

Postal / Zip Code: _____

Room: _____

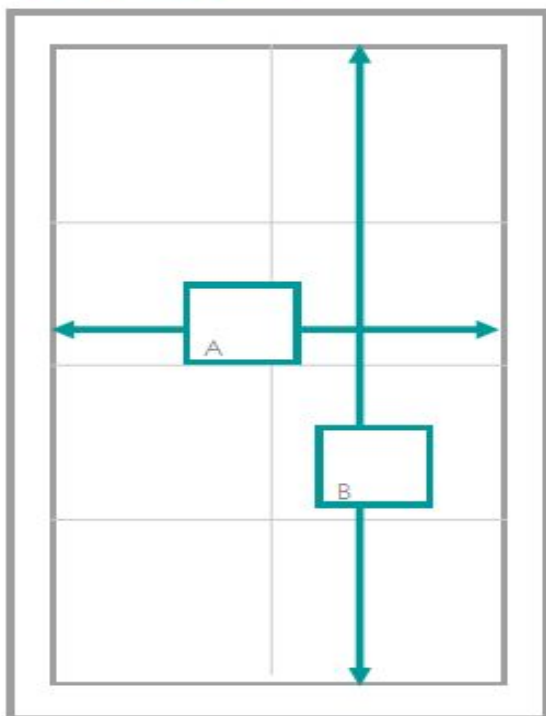

Fabric Collection: _____

Colour: _____

Lining: (please circle) cotton blackout

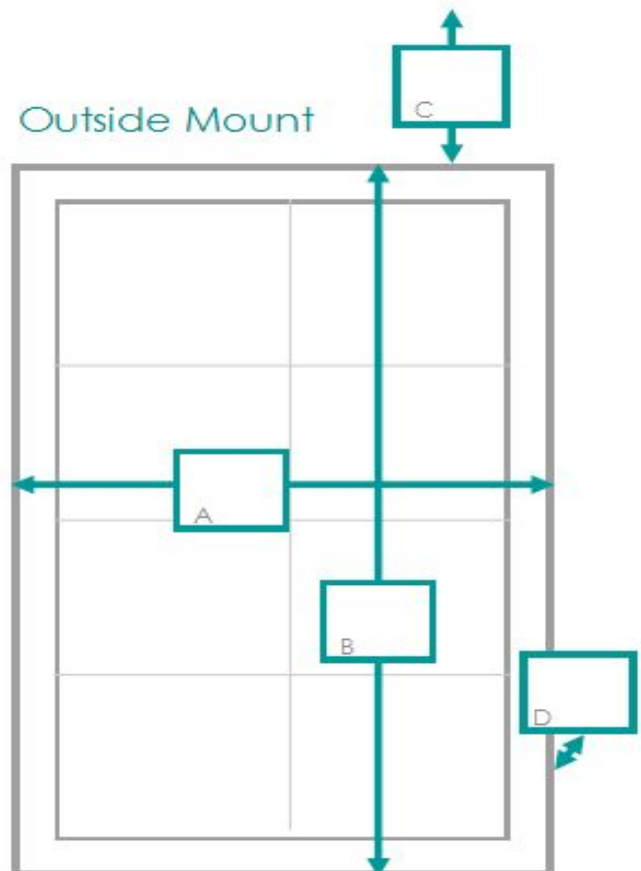

Control Side: (please circle) right hand control left hand control

Inside Mount

For an inside mount roman shade, there needs to be at least 1" window depth from frame to glass in order to mount the headrail.

Outside Mount

For an outside mount roman shade, also provide us with the measurement from the top of the window frame to the ceiling/crown moulding. In addition, tell us how far the trim of the window projects from the wall.

Simply fill in the squares, and you're on your way to perfect roman shades!
