How To Measure For Perfect Cordless Shades

First, provide us with your info and which fabric you love!

Name: _____

Postal/Zip Code: _____

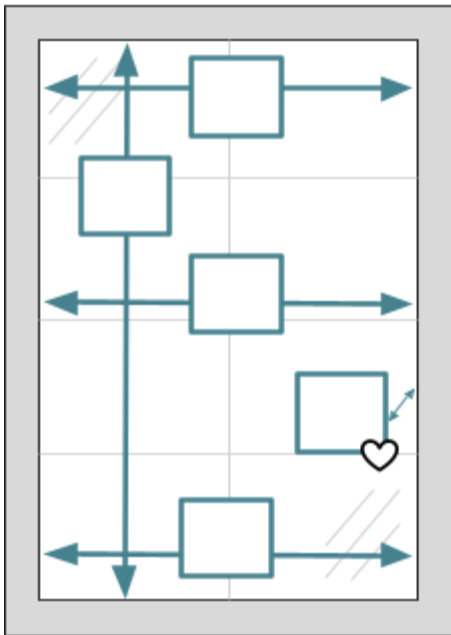

Room: _____

Fabric Name: _____

Fabric Colour and Openness: _____

Do you require a cassette: Y N

INSIDE MOUNT

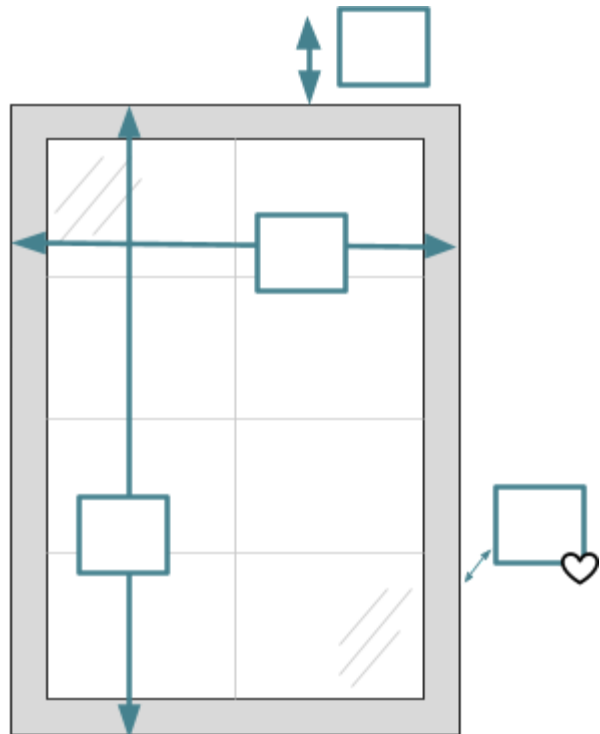

For an **inside mount** cordless shade, please fill in the blanks above. Measure the width of the inside of the window at the top, middle and bottom, and also provide us with the inside length.

♡ = the depth of the inside of the window trim

Note: there needs to be at least $1\frac{5}{8}$ " of window depth from frame to glass in order to mount the bracket and $2\frac{1}{2}$ " for the shade to be fully recessed.

If you are combining this with a faux shade you would require $3\frac{1}{2}$ " to accommodate both treatments.

OUTSIDE MOUNT

For an **outside mount** cordless shade, please fill in the blanks above. Measure the width and the length of your window from outside of trim to outside of trim. Please also let us know the distance from the top of the window to the bottom of the crown or ceiling.

♡ = how far the trim of the window projects from the wall

Note: shade projection will be $3\frac{1}{8}$ " out from the wall and 4" if you choose a cassette.

Simply fill in the blanks and you're on your way to perfect cordless shades!
