## How To Measure For Perfect Cordless Shades

First, provide us with your info and which fabric you love!

Name: \_\_\_\_\_

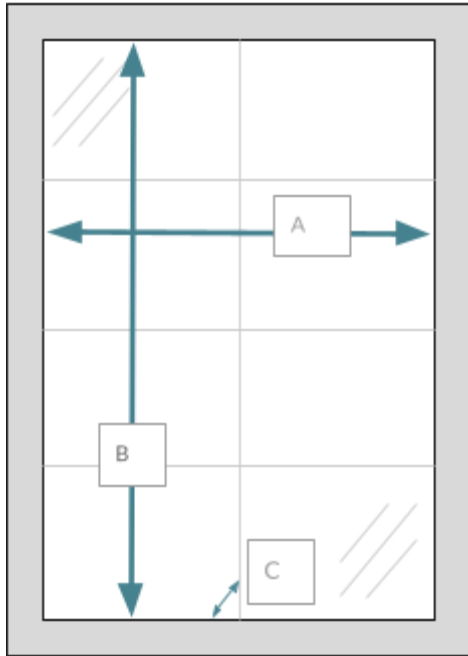

Postal/Zip Code: \_\_\_\_\_

Room: \_\_\_\_\_

Fabric Name: \_\_\_\_\_

Do you require a cassette: Y N

### INSIDE MOUNT

For an **inside mount** cordless shade...

Let us know:

(A) \_\_\_\_\_  
(width of window inside of trim to inside of trim)

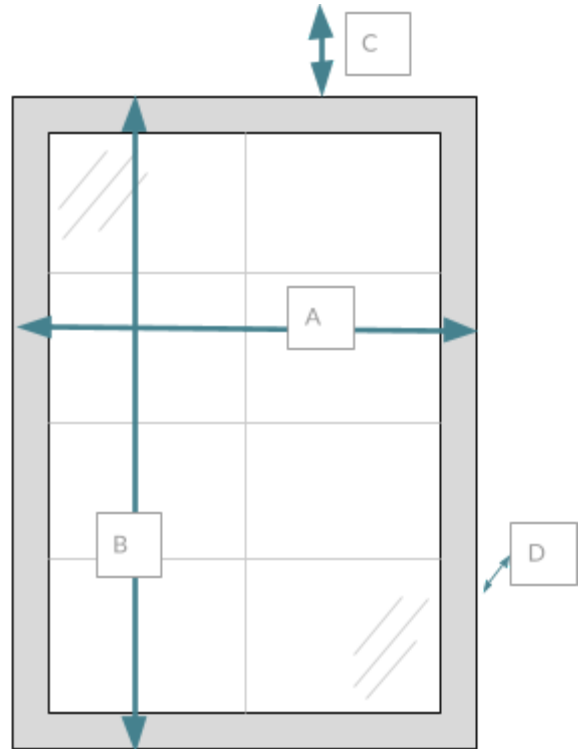

(B) \_\_\_\_\_  
(length of window inside of trim to inside to trim)

(C) \_\_\_\_\_  
(the depth of mounting space inside the trim)

Note: there needs to be at least 1" of window depth from frame to glass in order to mount the bracket and 2" for the shade to be fully recessed.

If you are combining this with a faux shade you would require 3" to accommodate both treatments.

### OUTSIDE MOUNT

For an **outside mount** cordless shade...

Let us know:

(A) \_\_\_\_\_  
(width of window from outside of trim to outside of trim)

(B) \_\_\_\_\_  
(length of window from outside of trim to outside of trim)

(C) \_\_\_\_\_  
(size from top of window frame to ceiling or crown)

(D) \_\_\_\_\_  
(depth of your casing as it extends out from the wall)

Note: shade projection will be 2.75" out from wall

**Simply fill in the blanks and you're on your way to perfect cordless shades!**
